SearchAmerica Introduces Address Checker™ and Payment Advisor Suite™

***New Offerings Affordably Validate Patient Demographics, Automate Charity and
Medicaid Screening, and Assess Payment Probabilities for Every Patient***

Minneapolis, Minn., Jan. 8, 2008 – SearchAmerica, the leader in prediction of payment and automated charity, Medicaid and other government program processing, today unveiled its new Address Checker and Payment Advisor Suite solutions. The new services are designed to help hospitals acquire and use accurate patient information at the Point of Service to uncover the best financial relationship for both parties.

Validate and Correct Patient Demographic Information

Address Checker is an affordable solution for hospitals to dramatically improve patient address accuracy at registration or pre-registration. By increasing the accuracy of patient demographics, hospitals can minimize third party billing rejections, returned patient letters and invoices, and bad debt write-offs. Address Checker is integrated into a hospital's existing information systems, and validates a patient's demographics, including full name, address, Social Security Number (SSN), date of birth (DOB) and phone number, highlighting inaccuracies in seconds.

Automated Screening and Payment Classification

Payment Advisor Suite consists of SearchAmerica's three industry-leading services that are also fully integrated to existing hospital information systems. The suite is designed to help hospitals properly identify and classify patients, and initiate the corresponding workflow. Payment Advisor Suite's integrated services include:

- Payment Advisor™ provides a prediction of payment likelihood.
- Charity Advisor™ screens patients for charity/uninsured discounts and produces the necessary documentation.
- Medicaid Advisor™ screens for Medicaid eligibility.

“With our new solutions hospitals can easily automate their patient demographic validation, payment predictability assessment, and charity or government program screening and enrollment,” said Daniel Johnson, President and CEO of SearchAmerica. “Not only can they save time for their financial counselors, hospitals will minimize bad debt and improve overall patient satisfaction by initiating the most appropriate payment processes.”

Address Checker and Payment Advisor Suite are immediately available from SearchAmerica.

About SearchAmerica, Inc.

Founded in 1994, SearchAmerica is the industry leader in prediction of payment and automated charity, Medicaid and other government program processing. It provides a complete range of real-time, integrated products that are used by more than 900 hospitals to improve their revenue cycles. SearchAmerica's quality and accuracy is best in class, and healthcare providers benefit from smarter data which produces a healthier bottom line. Documented case studies prove a significant return on investment, consistent with favorable public relations. SearchAmerica is headquartered in Maple Grove, Minnesota.
